JonEric Eubanks, PMP

AI Engineer · Azure AI Foundry & Multi-Agent Systems · Power Platform

Buffalo Grove, IL | joneric11@gmail.com | linkedin.com/in/joneric-eubanks-pmp-developer | github.com/JonEricEubanks | **Portfolio**

SUMMARY

AI engineer and Power Platform developer with 12+ years serving local government. Leads projects end to end — discovery, process mapping, build, and rollout — from multi-agent systems on Azure AI Foundry to Power Platform apps running in six Illinois municipalities. **Three-time Microsoft competition winner**, published Microsoft Tech Community author, and PMP who turns manual public-sector processes into automated, measurable workflows.

AWARD-WINNING AI PROJECTS · SOLO BUILDS

CivicGrant IQ — *Best IQ Agent, Microsoft Agents League 2026 (~31,000 contestants)* Solo · 2–3 weeks

- Five-agent municipal grant-intelligence system on Azure AI Foundry: 6-step grounded GraphRAG reasoning with every figure cited to a source document; integrates Foundry IQ, Work IQ, and Fabric IQ; React 18 UI streaming 23 SSE event types.

CivicLens — *Best Agent, Microsoft JavaScript AI Build-a-thon 2026 (~1,000)* Solo · ~1 month

- 5-stage agent pipeline (Intent → Data/ReAct → RAG → Synthesis → Report) backed by a JSON-RPC 2.0 MCP server with 16 tools; Leaflet hazard map with Weibull-decay prioritization of infrastructure work.

MAINTAIN AI — *Microsoft AI Dev Days Hackathon 2026* Solo · Feb 2026

- Six specialist agents across 7 orchestration pipelines analyze 1,281+ work orders to predict crew needs and optimize dispatch.

Kaizen AI — *GitHub Copilot Creative Apps Hackathon 2026* Solo · Feb 2026

- AI certification study coach built with Power Apps Code Apps, Dataverse, and Azure Functions.

EXPERIENCE

MGP (Municipal GIS Partners) — Illinois 2023 – Present

Low-Code Developer (Dec 2024–Present) · M365 Functional Consultant (Feb–Dec 2024) · GIS Specialist (2023–Feb 2024)

- **Led the Employment Lifecycle Management (ELM) app end to end** — discovery with Brookfield's HR manager and 7 department heads, process mapping, and build in Power Apps, Power Automate, and SharePoint; won Microsoft's global **Best in Automation** award (2025) and an official Microsoft case study.
- Rolled ELM out to 6 municipalities (Brookfield, Buffalo Grove, Riverside, Glencoe, Lincolnshire, Hanover Park), re-mapping each community's processes; the app saves 400+ staff hours per year.
- **Built a sewer CCTV inspection AI proof of concept** on Azure AI Content Understanding: a Python Azure Function and Power Automate pipeline proposes timestamped defect findings for inspectors to confirm in a canvas app; managed identity and user-delegation SAS keep keys out of the workflow, at about $3.54 per video-hour.
- Built LISA, a Copilot Studio agent grounded in municipal GIS data that automates 3,600+ property lookups a year (zoning, utilities, ownership) and eliminates manual GIS research.
- Replaced Glencoe's email-based early check approvals with a Forms, Power Automate, SharePoint, and Power Apps workflow with staged approvals, weekly targeted reminders, and auto-generated audit trails; built in 3 months, it saves 3–4 hours of follow-up a week and delivers $7K–$10K in annual value.
- Automated resident and HR processes: Brookfield raffle permits with online payment and one-click approval, Brookfield block-party permits (55+ hrs/yr saved), and Lincolnshire's employment application (complete HR packet in ~30 seconds); modernized Glencoe's water-service records (60+ hrs/yr); built Buffalo Grove's $7.2M Project 25 dashboard.
- Designed SharePoint intranets and Teams governance for municipal clients, and provided GIS support and technology consulting to municipalities across Illinois and Texas.

City of Fort Worth — Fort Worth, TX 2014 – 2023

Development Project Coordinator 2022 – 2023

- Bridged Development Services and city stakeholders, managing project timelines and staff accountability; streamlined permitting processes with Lean Six Sigma and resolved development issues with GIS analysis.

Neighborhood Program Coordinator 2017 – 2022

- Built Power BI and Smartsheet dashboards, including an Emergency Rental Assistance dashboard tracking $53M in federal aid across all council districts for leadership and council.

- Raised agency efficiency 27% through weekly dashboard updates and decision reports; managed community program budgets.

Neighborhood Services Liaison 2014 – 2017

- Analyzed Community Development Block Grant data, helping secure $2M for low-income neighborhood development.
- Cut Council Member program completion time 25% using Lean Six Sigma; saved ~10% on project costs through contractor bid negotiation; grew community engagement 30% through outreach campaigns.

TECHNICAL WRITING & COMMUNITY

- Published 4 articles on Microsoft Tech Community's Educator Developer Blog (2026), including "Choosing Multi-Agent Patterns in Microsoft Foundry" and "Understanding Harnesses in Copilot Studio."
- Created AI Teammate 101, a free, MIT-licensed hands-on workshop teaching developers to work with AI coding agents.

SKILLS

AI & Agents: Azure AI Foundry, Copilot Studio, Azure AI Search, multi-agent orchestration, MCP, RAG / GraphRAG, OpenAI GPT-4o, GitHub Copilot
Development: JavaScript, Node.js, React, Python, SQL, REST APIs
Azure: Functions, Static Web Apps, Cosmos DB, Blob & Table Storage
Power Platform & M365: Power Apps, Power Automate, Power BI, Dataverse, SharePoint, Teams, Smartsheet
GIS: ArcGIS Pro, ArcGIS Online, ModelBuilder, StoryMaps, Leaflet
Delivery: PMP, Agile, Lean Six Sigma, process mapping, stakeholder management

CERTIFICATIONS

GitHub Certified: Agentic AI Developer	2026
Microsoft Certified: Azure AI Fundamentals	2026
Microsoft Applied Skills: Develop agents in Microsoft Foundry	2026
Microsoft Applied Skills: Resolve GitHub issues using GitHub Copilot	2026
Microsoft Certified: Power Platform Fundamentals	2025
Microsoft 365 Certified: Fundamentals	2025
Project Management Professional (PMP), PMI	2021
Google Project Management & Google Data Analytics Professional Certificates	2020
Lean Six Sigma Yellow Belt	2016

EDUCATION

Coursework toward GIS Programming & Data Analysis — Tarrant County College
Coursework toward Applied Aviation Sciences — Baylor University / Texas State Technical College
